PROJECTS

STRETCHING APP

Built a full-stack React web application, where users can subscribe to view and save stretches and health-related articles.

- Stack: MongoDB and Mongoose, React with Vite bundler, and Express/Node
- Integrations: Stripe payments
- User actions: create account with password encryption, subscribe to free or paid tiers, like stretches and articles, view videos for stretches, and upload profile picture

JOB BOARD

Built a full-stack React web application, where users can manage tasks and create/publish jobs.

- Stack: Prisma (ORM), React with Vite bundler, Express/Node, TypeScript
- Integrations: Stripe payments
- User actions: create user account, tasks, and jobs; pay to publish jobs for various durations; hide, like, and filter jobs

ONLINE Pictionary

Built an online multiplayer Pictionary game.

- Socket.io based application
